Will forward for XA approval for public access.

Thanks David and all.

Heads up reminder we're taking water samples today, so we'll be needing to add the sample locations to the Story map. Aspect is in the air today, so, we'll have an aspect map tomorrow.

Adam

**Subject:** TPC Group Fire - Reporting Period 3

Morning,

Please find the attached map and data table for reporting period 3 (11/29 0600 – 11/30 0600).

There were 134 locations total air monitoring locations during this reporting period. The air monitoring results were reported below the detection limit at all locations for total volatile organic compounds (VOCs) and for 1,3-butadiene. 7 locations were reported above the screening level of 138 µg/m3 for particulates.

ASPECT did not fly.

Thanks,

**David Cook**
